Full Time Term Research Analyst

Cambridge, MA, US

Worker Category : **Other Full-Time**

The National Bureau of Economic Research is the nation's leading non-profit economic research organization.

The NBER has an opening for a Research Analyst (RA) who will support a project on the economics of innovation and science, focused on the life sciences sector.

Responsibilities are expected to include:

- Writing programs to match disparate data sources,
- Working with data sets, cleaning and running checks to spot errors, and preparing data for analysis,
- Assisting with literature reviews,
- Assisting in the preparation of academic papers being submitted to journals,
- Any other work assigned by Research Managers or PIs.

Candidates for this position will have a bachelor's degree in either computer science, economics, or biology. The ideal candidate will have good programming skills and knowledge of machine learning techniques. Strong familiarity with Stata and MySQL is definitely a plus.

The position is an especially good match for candidates contemplating application to a PhD program in economics or management in the near future.

The PIs are Pierre Azoulay (<http://mitmgmtfaculty.mit.edu/pazoulay/>) & Bhaven Sampat (<http://www.columbia.edu/~bns3/>).

TO APPLY:

Please assemble all materials into a single pdf, to be uploaded into the application:

- 1) A cover letter describing your interest in and qualifications for the position and your available start date.
- 2) Your resume

For more information on the NBER, please visit <http://www.nber.org> (<http://www.nber.org/>).

No phone calls, please.

The NBER is an Equal Opportunity Employer.

We do not discriminate on the basis of race, religion, color, sex, age, national origin or disability.

The NBER will make reasonable accommodation for any disabled applicant, and will provide assistance to disabled applicants as needed during the application process.
